1 PROJECT DETAILS

1.1 Summary Description of the Project

The Project Activity is a registered CDM Project with UNFCCC Registration number 6486. The Project Description refers to Section A.1 of the Registered Project Design Documentation (PDD), Section A.1 (Version 2.0.0 dated 21 June 2012)

1.2 Sectoral Scope and Project Type

The Project Activity falls under the following sectoral scope:

- ▶ Sectoral Scope 1: Energy Industries (renewable / non-renewable sources)
- ▶ Sectoral Scope 13: Waste Handling and Disposal

The above sectoral scopes are in-line with the sectoral scope as per Section A.4.2 of the above-stated PDD.

The Project is not a Grouped Project

1.3 Project Proponent

PT Navigat Organic Energy Indonesia ("NOEI"). NOEI is the investor and operator of the Project Activity. The company is registered in Indonesia, and is a host country Project Participant.

Contact Information:

Environmental Finance Division

PT Navigat Organic Energy Indonesia

Address: Lt. 18 Panin Tower Senayan City Complex,
Jl. Asia Africa Lot 19, Jakarta 10270
DKI Jakarta, Indonesia

Phone : +62 21 7278 2353

Fax: +62 21 7278 2358

Email: environmental.finance@noei.co.id

1.4 Other Entities Involved in the Project

PT Zeus Innnavitas ("ZEUS"). ZEUS is the advisory management entity for the CDM registration of the Project, and is a host country Project Participant

Contact Information:

Mr. H. Soeyoto

PT Zeus Innnavitas

Addresss: Lt. 07 Wisma Argo Manunggal
Jl. Gatot Subroto Kav. 22, Jakarta Selatan 12930
DKI Jakarta, Indonesia

Phone: +62 21 5292 2252

Fax: +62 21 5292 2253

Email: Soeyoto@zeus-innavitas.com

1.5 Project Start Date

The Project Start Date is the date of which the Project starts generating verifiable emission reduction, and this is designated as the first full day of which the Project enters into commercial transaction with the grid authority, which is the 26th of February 2011.

The CDM Project Start Date is 05th of December 2008, as outlined in Section C.1.1 of the Registered PDD.

1.6 Project Crediting Period

Under the VCS Standard, a project credit period can be a maximum of 10 years which may be renewed at most twice. With a starting date as specified in paragraph 1.5 above, the entire voluntary credit period ends the latest on 25th February 2041.

In addition to VCS, as of 05th of July 2012, this Project has been registered using CDM Standard with registration number 6486. Under CDM, the Project credit period commenced on 1st of August 2012 and can be renewed twice every 7 years. Thus, the entire CDM Credit Period shall end on 31st of July 2033.

For project applying multiple GHG programs, paragraph 3.9.3 of the Standard stipulates that such project is not eligible for VCU issuance after the date that is the earliest end-date of all applicable project crediting period, which is the 31st of July 2033.

As consequence, the Project's credit period thus covers the period of 26th of February 2011 to 31st of July 2033 (both days inclusive).

1.7 Project Scale and Estimated GHG Emission Reductions or Removals

Project	✓
Large project	

Years	Estimated GHG emission reductions or removals (tCO ₂ e)	
Year 1	tCO ₂	580,477
Year 2	tCO ₂	623,576
Year 3	tCO ₂	658,009
Year 4	tCO ₂	686,361
Year 5	tCO ₂	710,382
Year 6	tCO ₂	731,267
Year 7	tCO ₂	749,829
Year 8	tCO ₂	766,630
Year 9	tCO ₂	782,001
Year 10	tCO ₂	794,466
Total estimated ERs	tCO ₂	7,082,998

Total number of crediting years	10
Average annual ERs	tCO2 708,300

1.8 Description of the Project Activity

The full description of the Project Activity is outlined in Section A.4.3 of the Registered PDD. The expected operational lifetime of the project activity is specified in Section C.1.2

1.9 Project Location

The Project is hosted in the Republic of Indonesia, and located on the Province of West Java, the City of Bekasi, and specifically within Bantargebang Final Disposal Site facility.

The Bantargebang Final Disposal Site facility itself is a 120 hectares of area. The location of the power house is 6° 21' 04.21" South and 106° 59' 48.33" East.

1.10 Conditions Prior to Project Initiation

The condition prior to the project start date is a full atmospheric release of landfill gas and continuous usage of carbon-intensive grid electricity by the electrical end-users. This situation is identified to continue throughout the credit period, and hence established as the baseline scenario.

The demonstration of how this scenario is established is outlined in Section B.4 and B.5 of the Registered PDD.

1.11 Compliance with Laws, Statutes and Other Regulatory Frameworks

The Project's compliance to law are described in Section D.1 of the Registered PDD.

1.12 Ownership and Other Programs

1.12.1 Right of Use

The Letter of Approval for the Project was issued by the National Council for Climate Change ("Dewan Nasional Perubahan Iklim"), which is the Designated National Authority for Republic of Indonesia (the host country). The Approval were granted on 27 January 2011 for two host Project Participants: PT Navigat Organic Energy Indonesia and PT Zeus Innavitas.

1.12.2 Emissions Trading Programs and Other Binding Limits

Not applicable.

1.12.3 Participation under Other GHG Programs

The Project Activity is a registered project under the UNFCCC's Clean Development Mechanism GHG Program. The CDM registration date of the Project is 05th July 2012, with registration number 6468, and credit period commencing on 1st of August 2012.

1.12.4 Other Forms of Environmental Credit

As a registered CDM Project, the emission reduction resulting out of the project will be claimed as a CDM Certified Emission Reduction (CDM-CER), commencing on the starting date of the CDM credit period of 1st August 2012.

Any emission reduction occurring prior to the 1st of August 2012, is to be verified as voluntary actions, and thus the sought VCS Registration. As such, there will be no overlap between the emission reduction validated and verified as VERs.

1.12.5 Projects Rejected by Other GHG Programs

Not applicable

1.13 Additional Information Relevant to the Project

Eligibility Criteria

The Project is not a grouped Project. Eligibility criteria for inclusion hence is not relevant.

Leakage Management

Leakage is not expected out of the Project as all identified GHG emission sources possible occurs within Project Boundary, as has been identified by the applied methodology.

Commercially Sensitive Information

Not applicable

Further Information

The eligibility of the Project has been established in Section B.5 of the CDM PDD, as the Project is the first of it's kind in the host country. The compliance of the Project against it's environmental legal context are assessed in it's Environmental Impact Assessment, already reviewed as part of the requirement for Host Country Approval.

2 APPLICATION OF METHODOLOGY

2.1 Title and Reference of Methodology

Please refer to Section B.1 of PDD

2.2 Applicability of Methodology

Please refer to Section B.2 of PDD

2.3 Project Boundary

Please refer to Section B.3 of PDD

2.4 Baseline Scenario

Please refer to Section B.4 of PDD

2.5 Additionality

Please refer to Section B.5 of PDD

2.6 Methodology Deviations

Not applicable

3 QUANTIFICATION OF GHG EMISSION REDUCTIONS AND REMOVALS

3.1 Baseline Emissions

Please refer to Section B.6.1 of PDD

3.2 Project Emissions

Please refer to Section B.6.1 of PDD

3.3 Leakage

Please refer to Section B.6.1 of PDD

3.4 Summary of GHG Emission Reductions and Removals

Please refer to Section B.6.3 of PDD

4 MONITORING

4.1 Data and Parameters Available at Validation

Please refer to Section B.6.2 of PDD

4.2 Data and Parameters Monitored

Please refer to Section B.7.1 of PDD

4.3 Description of the Monitoring Plan

Please refer to Section B.7.2 of PDD

5 ENVIRONMENTAL IMPACT

Please refer to Section D of PDD

6 STAKEHOLDER COMMENTS

Please refer to Section E of PDD
